**Password: 651776**

At this seminar, Associate Professor Tale Steen-Johnsen will present various ways of building an argument based on empirical data. A recurring question for researchers doing qualitative analysis is how to make claims based on your data. When can you say that you see a pattern in the material, and when can you claim that you have found something substantial enough to present?

**Keynote Speaker:** Tale Steen-Johnsen, Associate Professor at the Dept. of Sociology and Social Work, University of Agder, Norway

**RESILIENT  
is funded by:**
