Password: 857230

Researchers collect and analyze data, and the results and findings from their research often come to inform policy and practice. But how can research findings also inform and advance our theories and ways of understanding? At this seminar, professor Ove Skarpenes (UiA), will talk about how researchers can theorize their research findings and contribute to the advancement of theoretical knowledge within their discipline.

Speaker: Professor Ove Skarpenes, University of Agder, Norway
